- Smooth surfaces and easy clean materials

Easy to use

- Easy checking of the pulp with see-through pulp container
- Drip stop to prevent juice from dripping
- All removable parts are dishwasher safe

PHILIPS

Juicer
500 W 1.5L in one go

HR1836/00

Highlights

Compact design

With only half the size*, this juicer takes limited space. You can leave it on your kitchen counter top or store it easily.

Direct serve

This juicer allows you to use your own glass (Max 12cm height). Place it directly under the integrated tap and you are ready to juice.

Make up to 1.5L in one go

Thanks to the innovative QuickClean extraction system, you can make up to 1.5L of juice in one go without needing to empty the pulp container.

QuickClean technology

A lot of pulp fibers usually get stucked in the sieve which makes it very difficult to clean. Thanks to the electropolished process, all surfaces of the sieve are smooth. This helps you swip away the fibers with a standard kitchen tool (sponge or brush).

All pulp in one place

All the pulp is collected in the only place where it should be : the pulp container. Due to its round design and smooth surfaces, it is easy to reach and remove. It also means there is no need anymore to remove pulp from other parts such as the lid.

Easy assembly

The different parts of the juicer have been designed to allow an intuitive assembling and handling. This drastically facilitates the whole cleaning process.

Smooth surfaces and easy clean

Smooth surfaces and easy clean materials

Drip stop spout

When activated, the drip stop will prevent the juicer from dripping. The drip stop spout is very easy to clean as it is detachable and it is made of dishwasher safe materials. With one simple move, you prevent the juice from dripping and keep your counter top clean.
